I want to make a payment using either a loan # or an invoice #

Payment Information

Invoice# or Loan# :

Last Name of the Borrower :

Amount Being Paid : [Add](#)

Choose Payment Date: 07/30/2021

Help Text

1. Login on desktop
2. Find the payments section
3. Find my bill
4. Add loan number
5. Figure out my amount
6. Add my payment info
7. Confirm
8. Pay

And if I make a mistake,
start over!

Our theory why

In many other industries, you don't acquire the customer until they make a payment.

It's the final hurdle to a conversion.

For this reason, **payments innovation has been a requirement.**

NETFLIX Sign Out

STEP 3 OF 3

Set up your payment

Credit or Debit Card     >

PayPal  >

Gift Code  >

Our theory why

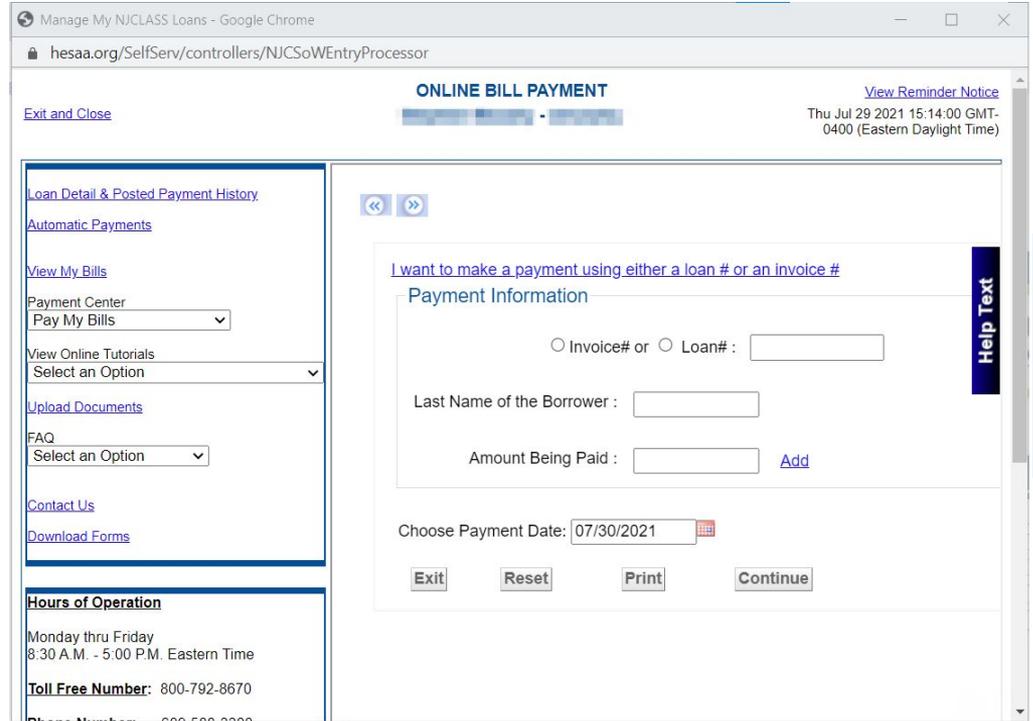

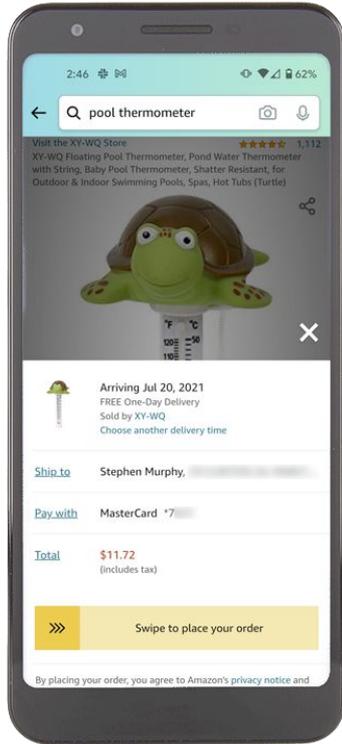

In lending, the customer is typically **acquired before a payment** is made.

Payments aren't barrier to conversion, so they didn't get the same level of attention.

Until recently.

Going from one to another creates friction

We decided to
explore this
friction.

Who we asked

2,676 adult consumers (age 18+) with representatives from all 50 U.S. states

Age Ranges

Household Incomes

What we wanted to learn

How do consumers *actually* want to pay bills?

What do they expect from the bill pay experience?

What would make bill pay easier?

How can businesses meet these changing needs?

Insight: Bill Pay is Stressful

Disorganization dominates bill pay

Top 5 Bill Pay Challenges

When asked what makes paying bills difficult, consumers responded:

1 52% Remembering logins, passwords and account numbers

2 41% Keeping track of payment due dates

3 30% Navigating poorly designed biller websites

4 26% Having to enter payment information

5 23% Keeping track of the amount owed each billing cycle

- Nearly half (48%) of consumers feel disorganized managing & paying bills.
- Keeping track of account numbers, dates, passwords etc. is a main culprit.
- Surprisingly, stress & disorganization isn't typically due to a lack of money- but instead the complicated bill pay process.

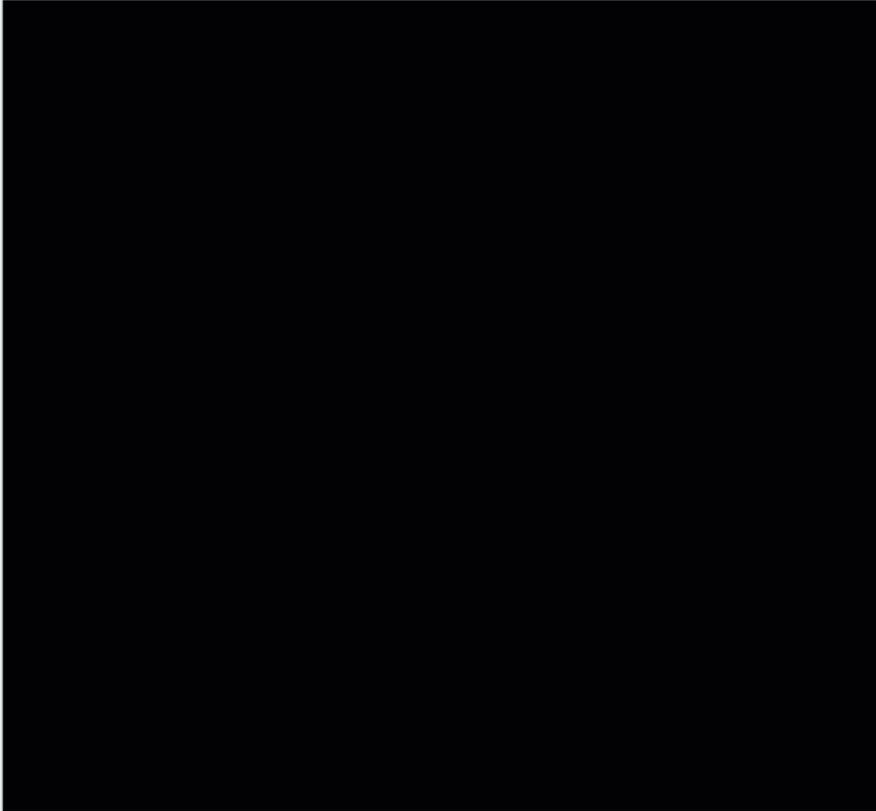

Prioritize payments on your website

Nearly one in three (30%) said navigating poorly designed biller websites led to stress in the bill pay process.

Eliminate this by prioritizing payments online and making it easy on desktop and mobile devices.

The screenshot displays the United Auto Credit website. At the top, a navigation menu includes 'Dealers', 'Customers', 'About Us', 'Contact Us', 'Careers', 'English', and 'Español'. The 'Customers' dropdown menu is open, with 'Payment Options' highlighted. Below the navigation, a banner features a hand holding a credit card over a laptop, with the text 'Looking for payment options?' and a 'Learn more' button. The banner is enclosed in a red border. Below the banner are three columns of content: 'Dealers' (Take your dealership to new levels...), 'Customers' (Need to make a payment or register your account? Visit our customer page for options. Register and Access Your Account > Make a Payment >), and 'Careers' (Looking for a career that challenges you to make a difference? Search our openings. Look for Opportunities >). The 'Customers' column is also enclosed in a red border. At the bottom, a dark blue footer contains 'English Español', 'Dealers' (Dealer Overview, The Fast Lane, Dealer FAQs), 'Customers' (My Account, Payment Options, Customer FAQs), 'Our Company' (Careers, Contact Us, Site Map), and 'Legal' (Online Privacy Policy, Privacy Notice, California Privacy Notice, Web Accessibility). Social media icons for Facebook, LinkedIn, Instagram, YouTube, and Twitter are present. A 'Live Chat' icon is in the bottom right corner. The copyright notice '©2021 United Auto Credit® | All Rights Reserved.' is at the bottom center.

Another great example

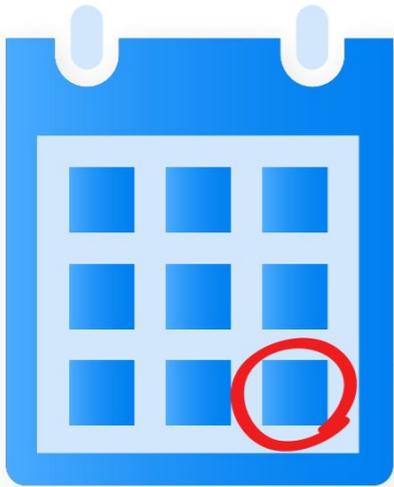

- They know most customers are visiting their site to make a payment
- Offers both login and guest pay options
- Works on mobile, desktop and tablet to cover all bases

Stress = more late & missed payments

Bill Payment Management

Adult consumers (53%) give themselves a grade of C or lower in knowing when their bills are due, with a whopping 21% scoring themselves even lower.

A
18%

I can easily tell you the exact due dates for all of my bills (18%)

B
30%

I know most of the exact due dates for all of my bills (30%)

C
32%

I know approximately when all of my bill payments are due, but would need to verify (32%)

D
13%

I know approximately when most of my bill payments are due, but would need to verify (13%)

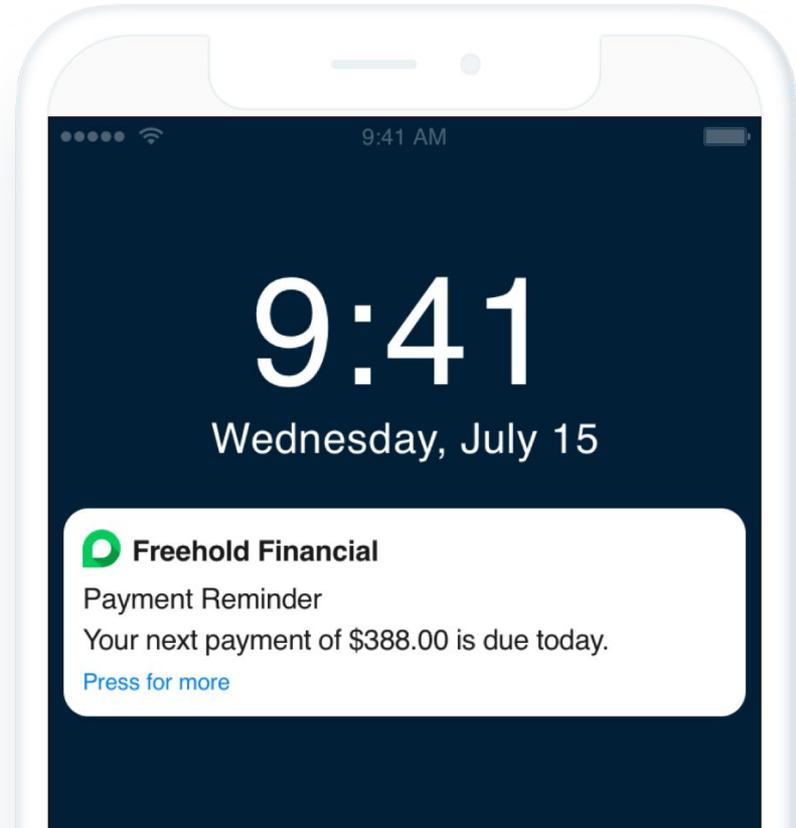

F
8%

I don't have a good handle on the due dates for my bills (8%)

- Stress and disorganization lead to late and missed payments
- More than half of adults (51%) paid at least one bill late during the past 12 months, and more than 1 in 5 (21%) paid bills late more than four times during the last 12 months.

Reduce memory strain with reminders

Nearly half of adults surveyed (45%) say it would be easier to pay bills on time if they received a text message or email reminding them when their bills are due.

Turner Acceptance turns texts to self-service

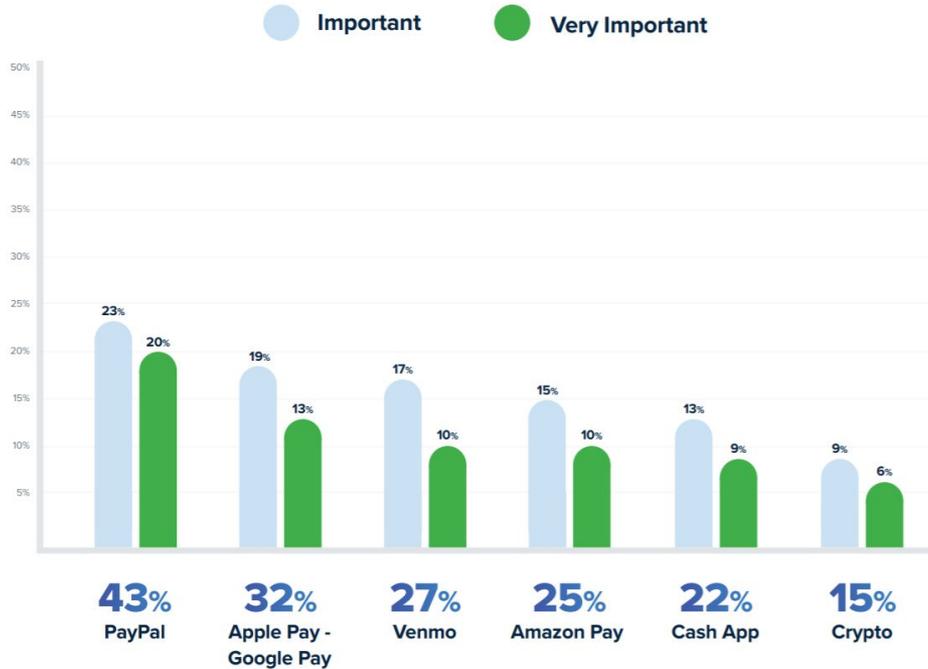

“The beauty is that all customers can make payments easily at their fingertips. Customers feel more comfortable knowing that they control when they can set up a recurring payment, stop payments or set future payments [themselves]. The fact that one-click payment links are on their mobile device—and that it’s secure—facilitates self-service and allows us to reduce unnecessary calls to our agents.”

– *David Uribe, Director of Initiatives, Turner Acceptance Corp.*

- Within the first 60 days of implementing **PayNearMe Engagement Engine**, Turner increased self-service by more than 20%.
- The solution also removed the need for customers to call in to agents to complete payments, check balances, etc.

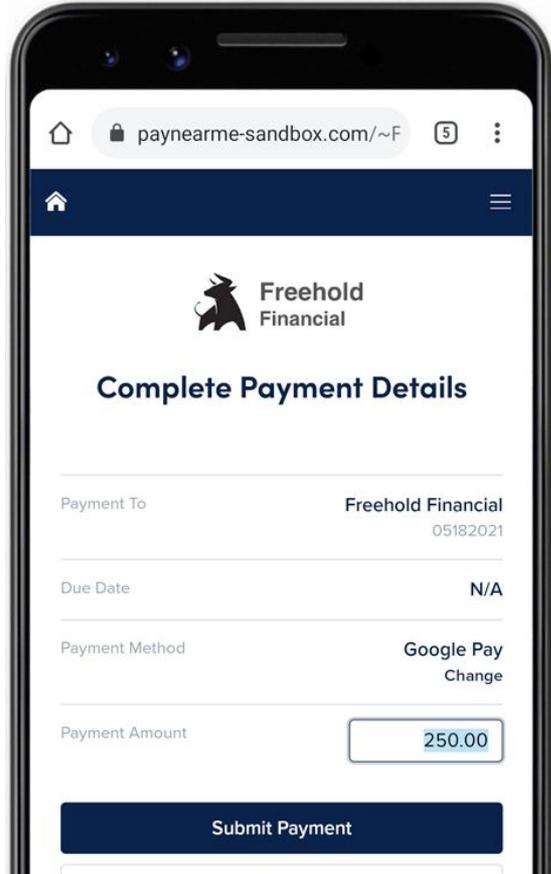

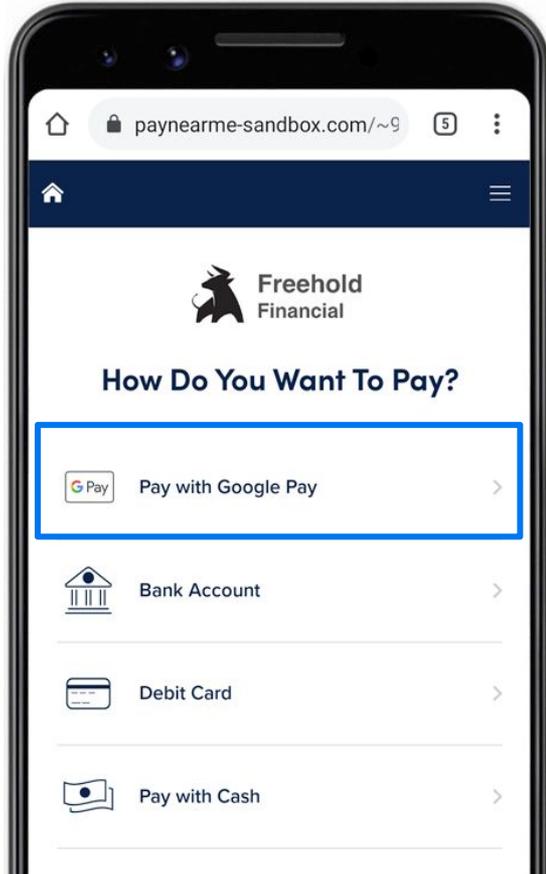

Insight: Mobile Matters

Consumers want more mobile options

- 43% say using PayPal to pay bills is important or very important
- 36% of respondents say if they had the option, they would be likely or very likely to use Apple Pay or Google Pay to pay bills
- 27% point to Venmo as a preferred way to pay their bills

Use smart payment options on mobile

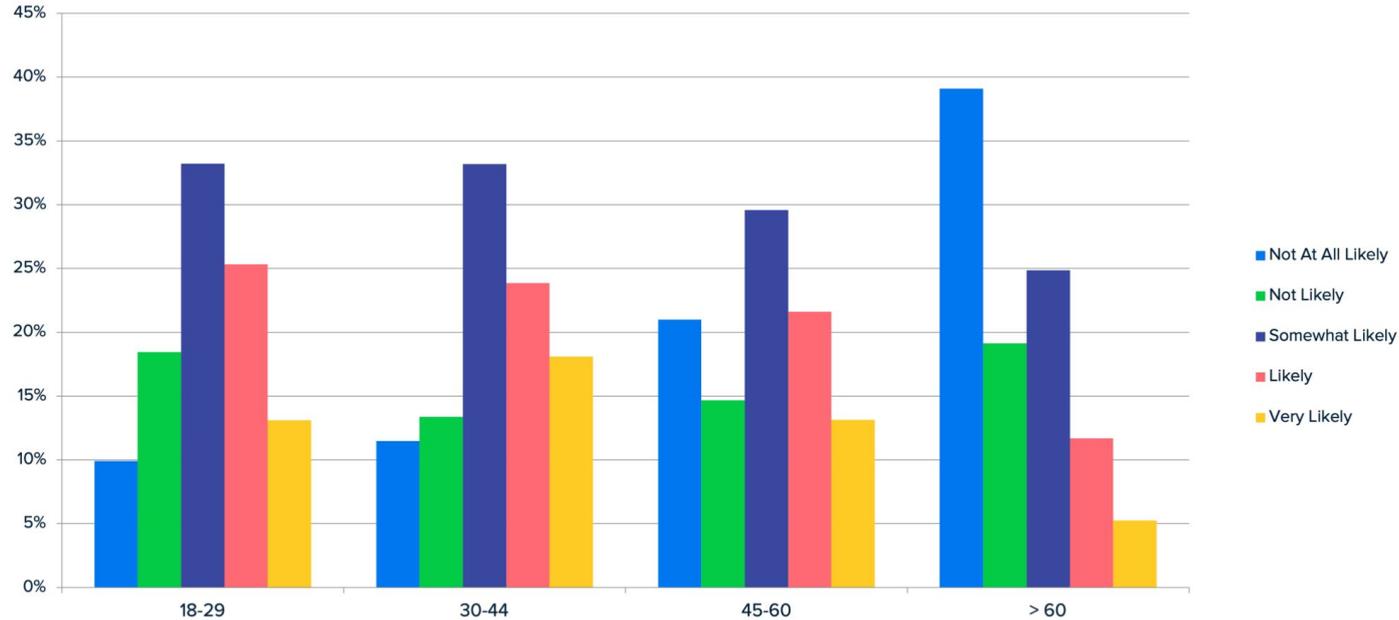

When using an Android based phone, show Google Pay.

When using an iOS device, show Apple Pay.

Make it easy for customers to use mobile-first payment types and reap the benefits (i.e. lower chargeback rates, fewer input errors, etc.)

QR codes continue their comeback

If offered, how likely would you be to pay your bills in the following ways?
(Those who selected QR code, by age group)

Try it yourself!

Scan the QR code with your phone's camera and see how it enters you directly into a personalized payment flow.

Use this to turn **paper statements** into mobile payments.

Easier than EZ Pass?

Insight: Consumers Need More Information

All of these can clog up your phone lines

“I can't find my bill”

“I need to make a payment”

“How much is left on my loan?”

“I forgot my password”

Right information, right time

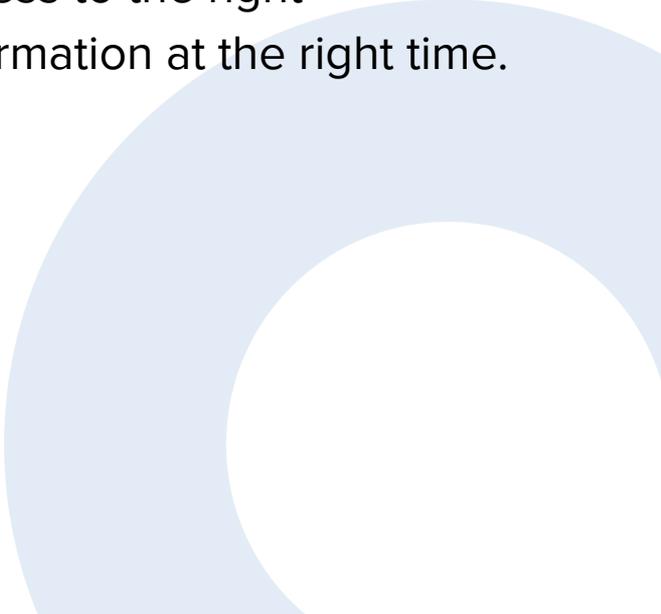

eBills

78% of consumers say it would be helpful or very helpful to have access to their entire bill when making or managing online bill payments.

Digital Wallets

42% of consumers would be likely or very likely to use their digital wallet to store, view and pay their bills from a single place if given the opportunity.

To reduce bill pay headaches, consumers need access to the right information at the right time.

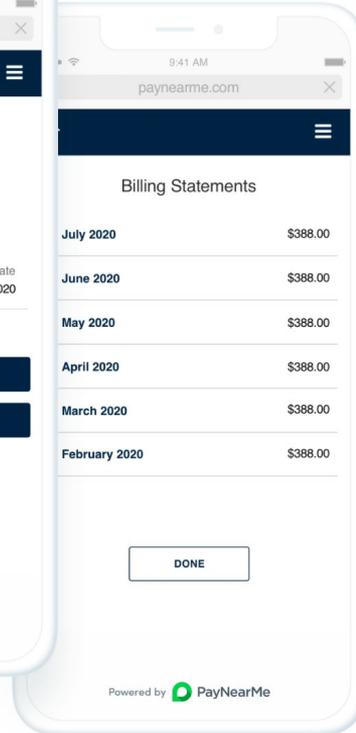

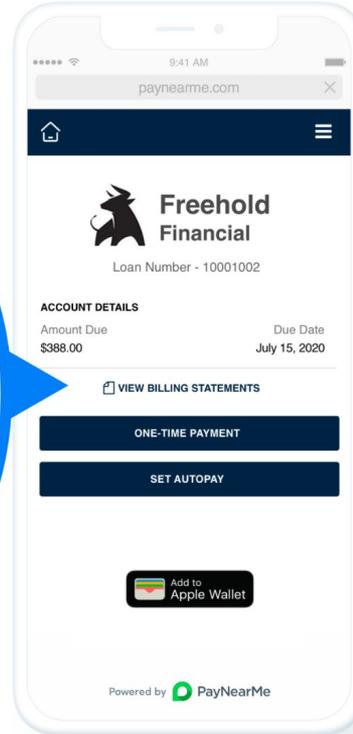

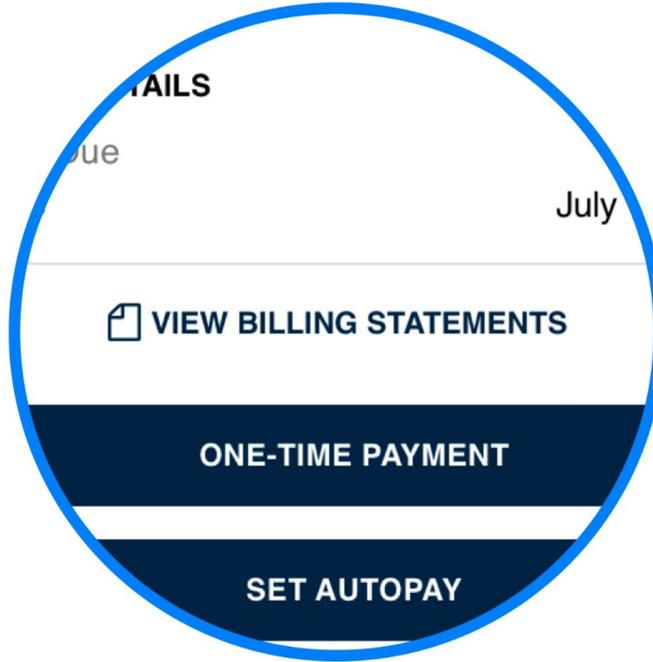

Use digital wallets as pseudo-apps

All the benefits of an app without developing/managing an app on your own.

Natively installed on nearly every smartphone.

Include FAQs, payment links and other information that makes payments easier.

Providing billing info when & where it's needed

Recap – what consumers want

- More mobile payment options
- Less complicated password/login processes
- Reminders when bills are due
- Better access to billing information & management across multiple channels

= Easier bill payment experiences
